

Draft Minutes
GSA-GSP Meeting
Aliso Water District
Tuesday January 25, 2022

Board members and public present:

Director Michael Logoluso Director Jeremy Seibert Director Ross Franson
Director Roy Catania Director Bernard Puget (on phone, no voting privileges)

Audience present or by telephone:

David Holland Joe Hopkins Katie Durham Rick Iger Kristi Robinson
Martin Britz John Gaugel Maryse Supiger

Roy Catania called the meeting to order at 2:11 P.M.

Approval of minutes of October 26,2021.

M/S Jeremy Seibert and Mike Logoluso to approve the minutes as mailed.

Director Mike Logoluso Aye
Director Jeremy Seibert Aye
Director Ross Franson Aye
Director Roy Catania Aye

The President then publicly announced the motion passed.

Subsidence update: Rick Iger informed the Board the subsidence readings are complete but haven't been published.

Water Rights Update: The SWRCB is asking for more information on our Flow Availability Analysis prepared by MBK of Sacramento. The District has received several protest letters to our application which the District has responded but no one is willing to dismiss their protest. The District's temporary water right application has been filed which will be for a 180-day term. The District's Streambed alteration agreement has been filed and the California Dept. of Fish and Wildlife has until February 18th to respond. The District's collaboration effort with Madera County has slowed down due to busy schedules.

Transducer update: A reminder to send transducer information to Ken Schmidt regularly and the District is looking for more opportunities to install new transducers.

GSP implementation: DWR has reviewed Aliso's GSP plan and is looking for more detailed information. One issue DWR identified between the 6 GSP's in the Delta-Mendota subbasin was the lack of coordination and the different methodologies being used in their GSP's

Well Grant Funding: Funding for taking videos of wells in the District is available if any grower is doing pump repairs this winter.

The annual report is almost complete with current hydrologic conditions in the District being sent to DWR.

Chowchilla Canal Bypass Project: P&P has been engaging with the various regulatory entities that have an interest in the District's recharge project conveyance system. It currently looks like the District would be better off financially and timewise if they would invest in some mainline pipe and negotiate with the adjacent land owner for a temporary pipeline access.

Grant Funding: there is more DWR authorized grant funding available through Prop 68 in the tune of \$1.3 M for Aliso to use for their recharge project. This is a non-competitive grant without additional matching funds requirements and just when everyone was thinking Christmas was over. The Aliso Water District was asked to provide a letter of support to the Del Puerto Water District on behalf of the Delta-Mendota Subbasin for DWR's SGMA Projects funding solicitation. There is also a Resolution from the Aliso Board required to authorize Del Puerto to submit this grant application on Aliso's behalf.

M/S by Mike Logoluso and Jeremy Seibert to provide a letter of support for Del Puerto Water District application on behalf of the water authority along with a Board Resolution for an application to be made by the Del Puerto Water District on behalf of the Aliso Water District.

Director Mike Logoluso	Aye
Director Jeremy Seibert	Aye
Director Ross Franson	Aye
Director Roy Catania	Aye

The President then publicly announced that the motion passed

Director Catania reminded the board that the Farmland Mgt. Recharge Pond Lease Payment is due May 1st.

Other business to come before the Board:

Dave Holland said he would check with Paris, Kincaid, and Wasiewski on the status of the California Sportfishing Protection Alliance to see what will be happening now that DWR has reviewed Aliso's GSP

There was a reminder that the 2021 surface water diversion reports are due

Aliso's static water levels are due between Feb. 1st and the 14th.

Aliso purchase some insurance coverage to cover the District's flow meter installed at the River diversion for \$250.00, the coverage is up to \$10,000.00.

Public comment, there was no public comment

Next meeting April 26, 2022

Meeting adjourned at 2:53 P.M.
